Supermarket Solution

Agenda

- Intelligent Technology for Supermarkets
- Solution #1: COVID-19 SafeOccupancy™ Solution
- Solution #2: Queue Counting Solution
- Solution #3: Electronic Shelf Label
- Smart Supermarket Solutions
- Getting Started for Partners

Requirements from the Supermarket Industry

Here are some of the major concerns from the supermarket industry:

1. “How can I automatically control the number of visitors in the supermarket to comply with social distancing guideline?”
Live Occupancy Monitoring System
2. “How can I manage the staff level on the shop floor to match the current occupancy?”
Live Occupancy Dashboard
3. “How many checkout lanes should I open right now to minimise the queue waiting time?”
Queue Management Dashboard
4. “How do I make sure that the stocks are always available on the shelf to avoid missed sales opportunities?”
Empty Shelf Alert
5. “How can I dynamically update my pricing for perishable items such as fresh fruits and vegetables?”
Dynamic Pricing
6. “How can I synchronize my pricing across multiple supermarkets during a campaign?”
Instant Pricing Update
7. “How can I quickly pick up the right items from the right shelf?”
Stock Picking

Smart Supermarket Solution

With our large portfolio of IoT solutions, we have narrowed down to these three solutions that will target the supermarket industry:

1. Live Occupancy Monitoring System:
Control occupancy level in real-time without the need to employ a physical personnel
2. Queue Monitoring Solution:
Optimise checkout operation by opening the right number of cashier lanes at the right time
3. Electronic Shelf Label System:
Simplifying store operation with efficient pricing update, tracking product location and auto-detecting empty shelves

Intelligent Technology for Supermarkets

Smart Supermarket Solutions

- FootfallCam is able to provide an end-to-end smart supermarket solution, to help supermarkets to enhance their operation execution with a set of actionable KPIs.

Case Studies

- Some of our biggest customers include:
 - Whole Foods: 500 stores in the US
 - Makro: 2,200 stores in 32 countries
 - Amway: Operates in over 100 countries

#1: Live Occupancy Monitoring System

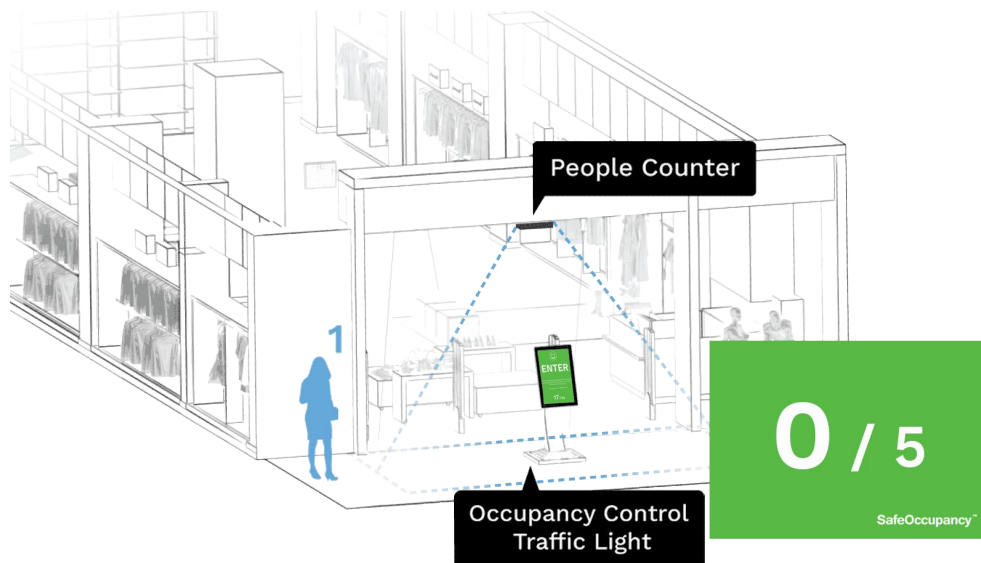

How does it work?

Watch how it works: https://youtu.be/wVO_RszdNBI

Install People Counter at entrances and exits

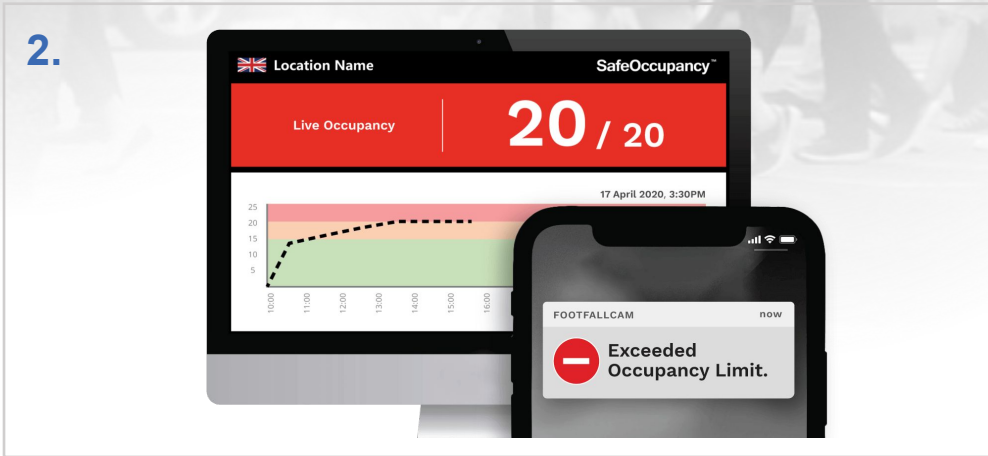

- Above 95% accuracy with 3D stereoscopic video technology
- Wide coverage of entrance with dual fisheye lens
- Long durability with high quality industry steel case
- Find out more by watching our COVID-19 live occupancy solution webinar here:

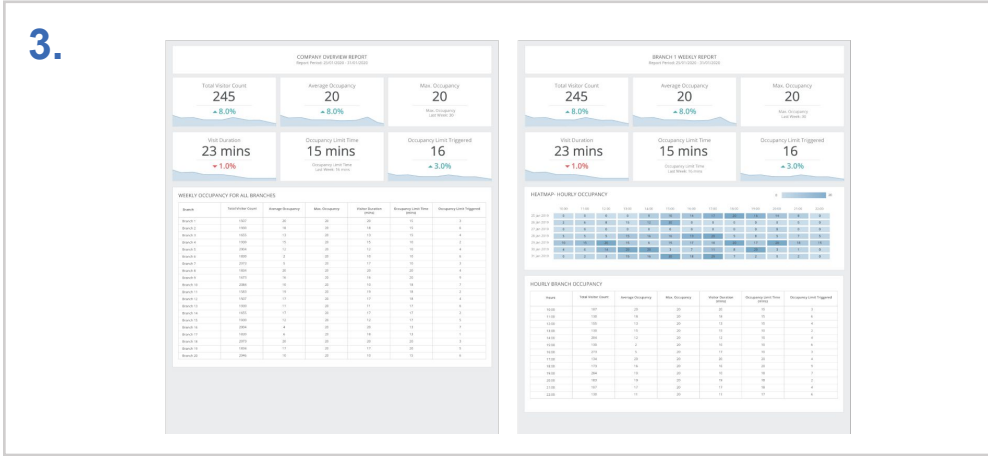

SafeOccupancy™ Key Features

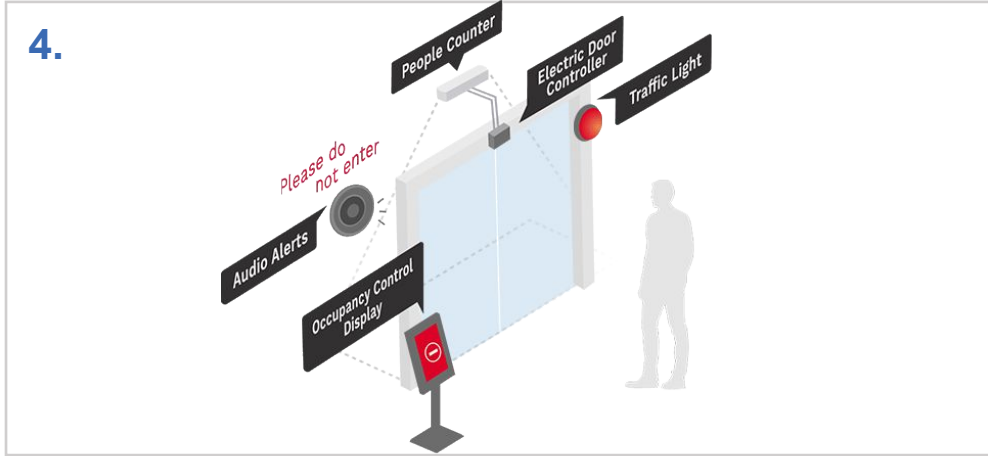

Customer-facing dashboard showing live occupancy

Employee-facing dashboard and staff alert notification system

Occupancy reports including customer behaviour and employee performance

Additional alert options such as traffic light, electric door controller, and audio alerts

Different Options for Notification

	When the occupancy limit is BELOW the threshold	When the occupancy has EXCEEDED the threshold
Traffic Light	Turns green	Turns red
Audio Alert	Broadcast welcome message	Send out audio warning messages to prevent customers from entering
Electric Door Controller	Allows customers to enter	Automatically closes the door to prevent more customers from entering

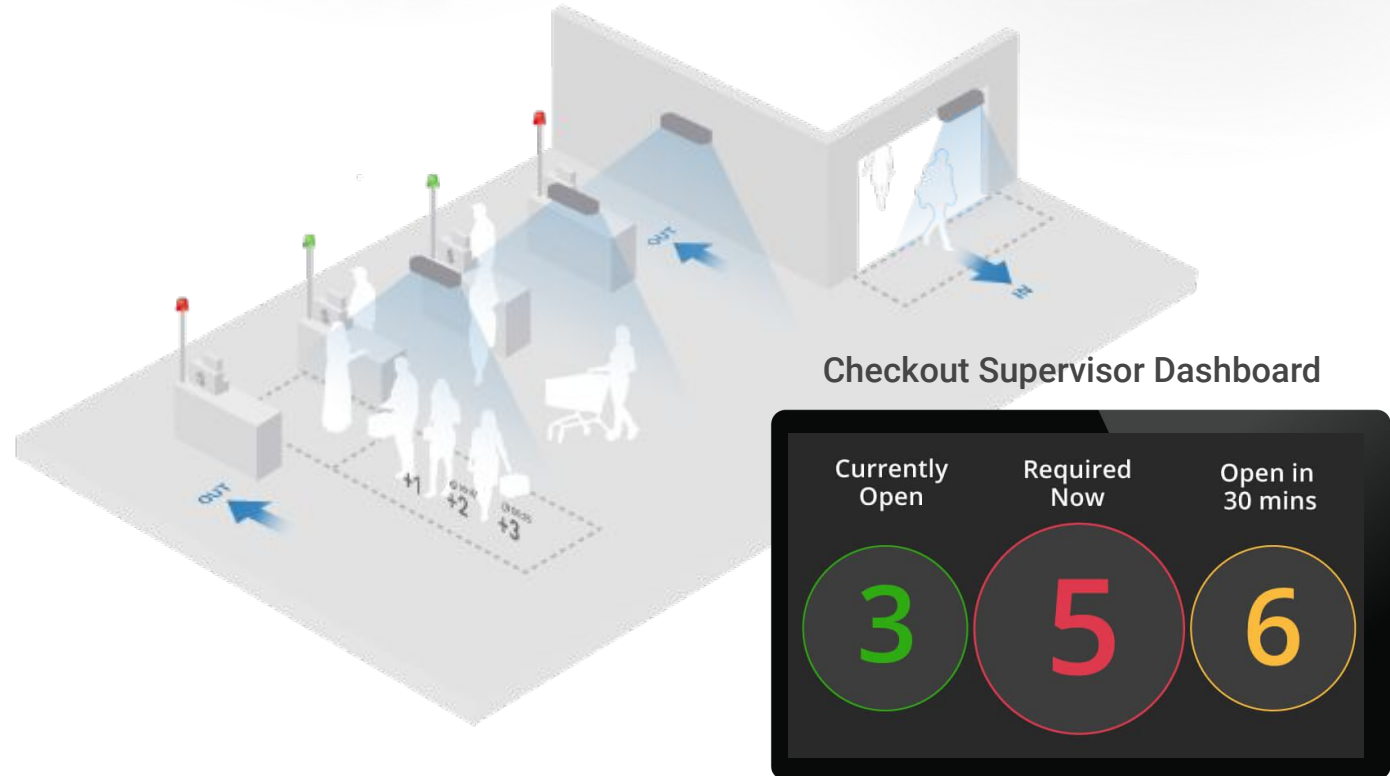

#2: Queue Monitoring Solution

Overview of Queue Management System

“We have sensors that sense the number of customers entering a store and predict the checkouts that need to be open ... we can monitor and manage the service customers get much more precisely — by customer, by store and by the minute.”

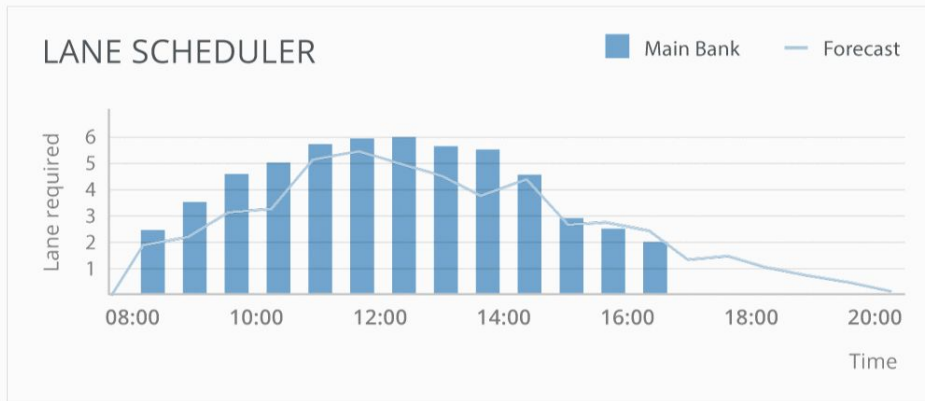

Sir Terry Leahy, former CEO – Tesco

Why Queue Management System?

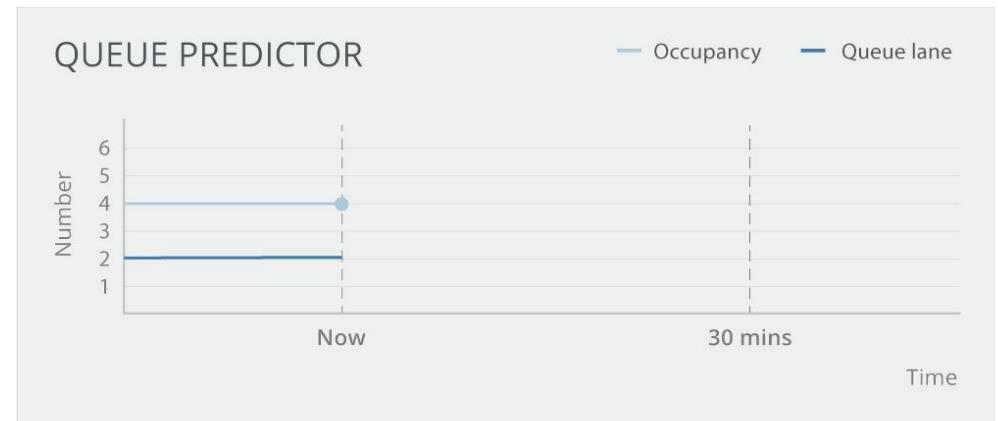

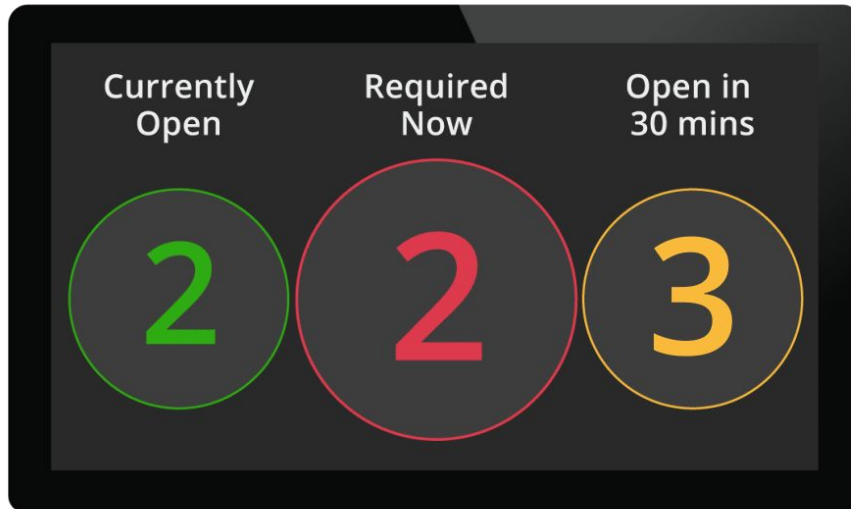

- According to survey, the single point of frustration for customers is that they have to queue up very long to checkout.
- Checkout supervisors have to ensure the checkout lanes opened are sufficient based on the current queue length.
- A tool to assist checkout supervisors in carrying out their task efficiently and accurately.

Lane Scheduler

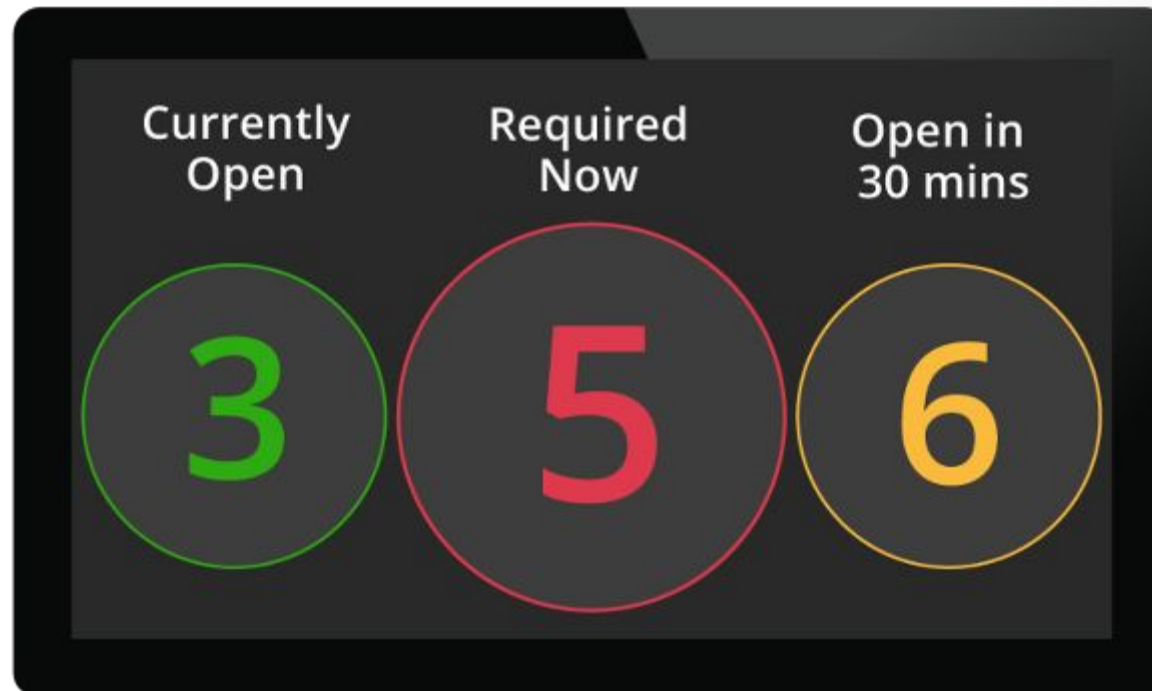

- Manage the staffing requirements weeks in advance based on historical data and the best estimates of the future traffic.
- A structured approach to scheduling whilst enabling labour cost optimisation and improving customer service.

Queue Predictor

- **Predicted analysis** based on **current occupancy** and **historical data pattern** for store manager to assist in decision making such as:
 - Cope with imminent increase in demand by opening new lanes.
 - Redeployed the staff from checkouts to other areas.

Checkout Supervisor Dashboard

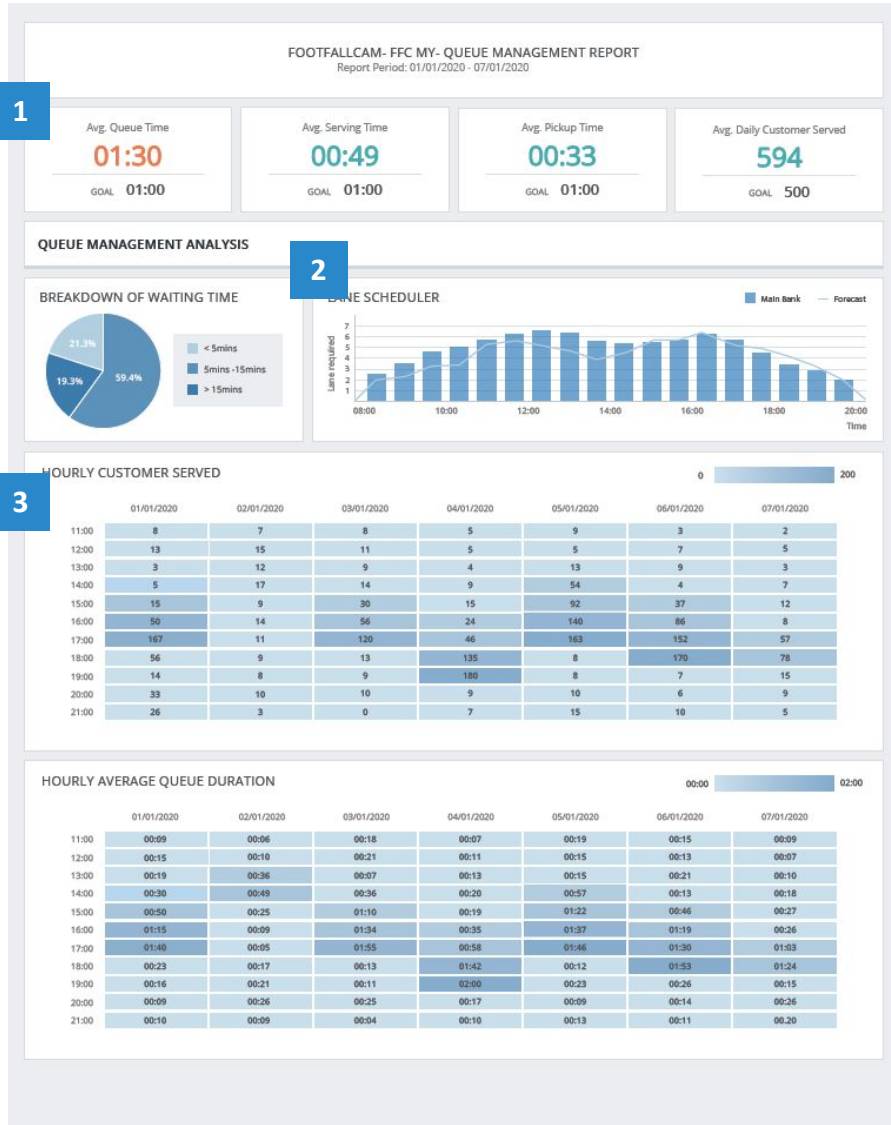

Checkout Supervisor Dashboard

- Display the number of active lane and the actual number of lane require based on current demand.
- **Predict the number of lane needed in the next 30 minutes** to maintain desired service quality.
- To improve operational efficiency and reduce labour cost.
- Generate an **instant notification** to store manager when service time limit is breached.

Queue Management Report

Measure KPI Performance across all branches.

1 How long customers have to wait in the queues?

Clear insight into the queue condition based on Queue Length, Queue Duration, Serving Duration.

2 The Number of Lanes Opened

Pre-plan for checkout lane in advance based on **historical data** and the best estimates of the future traffic.

3 Identify the Peak Hours and Long Queue

Manage the staff deployment based on peak hour to prevent lost of potential customer due to excessive queue lengths.

View Sample Report [here](#).

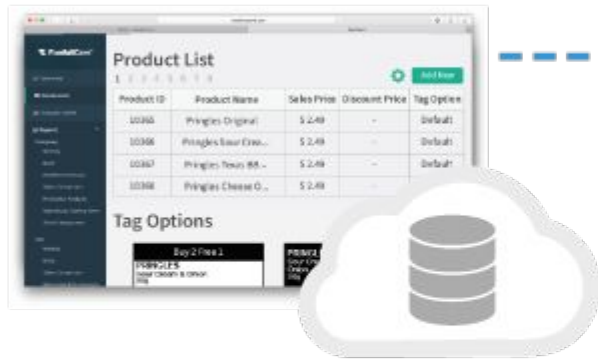

#3: Electronic Shelf Label System (ESL)

LabelNest™ - Electronic Shelf Label System

LabelNest is a complete system solution designed to simplify store operation with efficient pricing update, tracking product location and auto-detecting empty shelves. At the same time, LabelNest also helps business owners track store performances by measuring customer engagement metrics on a product-level and make data-driven business decisions.

Watch how the pricing updates are carried out for ESLs in bulk [here](#)

Accurate, Reliable Pricing

- Instant update of pricing for perishable produce
- Avoid pricing mismatch between stores when there is a pricing update
- Carry out bulk updates of any pricing changes through LabelNest Platform Manager centrally
- Ensure the pricing integrity so that the pricing on the shelf is the same as the price at the POS

Reduce Labour Cost

- Automated pricing update helps to:
 - Replace the need to have dedicated personnel to update and audit the pricing changes
 - Prevent human error during manual pricing updates
 - Reduce loss of sales or stock issues due to wrong pricing

Stock Picking

LED Light-Assisted Stock Picking

- As some of the supermarkets are moving towards e-commerce, there is a higher need for stock picker
- Speed up the stock-picking process by identifying the flashing LED lights of the ESL label of the picked items
- **Identify the optimum routes using planogram of the stores for product picking convenience.**

Useful for Resource-Constrained Businesses

- Increase efficiency in **stock-picking.**
 - **Reduces the need for training and store knowledge.**
 - **Staffing becomes easier and much more affordable.**

Product Geolocation

Watch how it works: https://youtu.be/_O4wRPdhTCE

Automated ESL Tag Positioning

- To **automatically locate** the latest geo-location of every product **after every repositioning**.
- Using the camera to **visually geo-locate the flashing LED light** during non-operating hours to find the exact location of the ESL tag with an **accuracy of less than 5mm**.

Linking the Product Position and Movement of Shopper

- Able to **pinpoint the exact product location**, and by tracking the shopper's movement, information on **customer engagement with products** can be derived.

Product Engagement Analytics

Answering managerial concerns based on data-driven metrics and analysis

- What is the market response to each of the product?
- What is the sales conversion for each item?
- Are my products being placed effectively for customer engagement?
- What are my best-performing and worst-performing products?
- Are my products performing the same across the different branches?
- How can supermarkets capitalize on the product engagement analytics by selling it to the suppliers?

Product Engagement Analysis

Empty Shelf Alert

Empty Shelf Detection

- Using Skeleton Tracking, the distribution of products in shelf can be detected through the built-in lenses of the ESL transmitter
- Alerts (text messages) sent to staffs when shelf is detected as empty

Avoid Missed Sales Opportunities

- Staffs can carry out the quick replenishment of stock
- Reduce customer's frustration and avoid unnecessary compensations
- Reallocate the staff to focus on other priority tasks instead of focusing on stock level monitoring

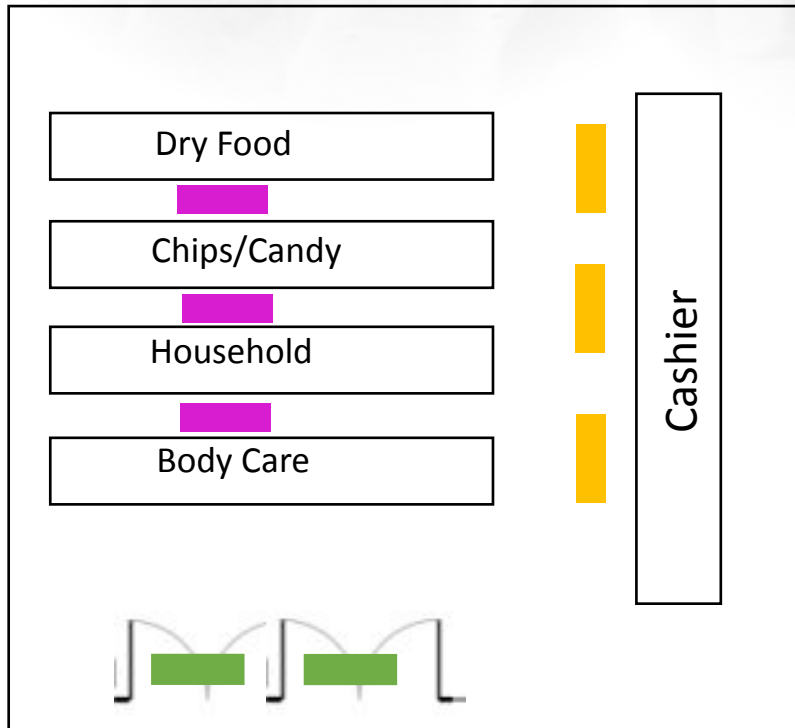

Watch how it works: <https://youtu.be/jQfPqjguP64>

Smart Supermarket Solution

3x solutions in one system

Proposed Business Solutions

Solutions	Number of camera	Camera Indicator
1. Live Occupancy, Footfall, Queue Prediction	2x	
2. Queue Counting at the Cashiers	3x	
3. ESL, Product Geolocation, Customer-Product Engagement, Heatmap	3x	

API: Integrate with ERP applications

Valuable insights on business KPIs

- Push and pull integration options:
 - Send data directly from the counter
 - Send data from the server (FootfallCam's cloud server or customer's own corporate server)
- Compatible with commonly used BI/ERP systems such as GoEpos, BusinessObjects, SAP ERP, etc.
- Create customized reports by combining customer's existing ERP data with the footfall data from our counter
 - Generate more in-depth and intelligent business insights by adding another layer of footfall data
- Link to our API documentation here:

<https://www.footfallcam.com/Content/data/documents/Download-Page/FootfallCam-API-Documentation.pdf>

Getting Started for Partners

Identifying the Characteristics of the Demand for Supermarket Solution

- Supermarkets will have immediate high demand for occupancy control solutions
- Target key decision-makers such as CEO and Directors
- Quick and high conversion rate from cold emails and cold calls
- Get your foot in the door by selling SafeOccupancy™ first
- Propose queue counting and electronic shelf label solutions as the second and third phase

How will FootfallCam work with our partners?

- FootfallCam will provide support to our partners in each step of the sales process
 - Solution consultation
 - Floor plan design
 - Drafting proposals
 - Monitoring during trials
 - Installation support during rollout
- Partners' role:
 - Understanding and locking down customer's requirement
 - Advancing the sales process by guiding the customer
 - Having the right action plan for each step of the sales process
