PRODUCT DIMENSION

STAFF EXCLUSION USING AI VIDEO ANALYTICS

- Unique pattern designed recognisable by footfallCam counters
- Privacy and Security: Identification anonymise
- No wireless emission and battery maintenance
- No training and disturbance of staff routine
- Safe and easy to use: PII compliant

HARDWARE & ENVIRONMENTAL REQUIREMENTS

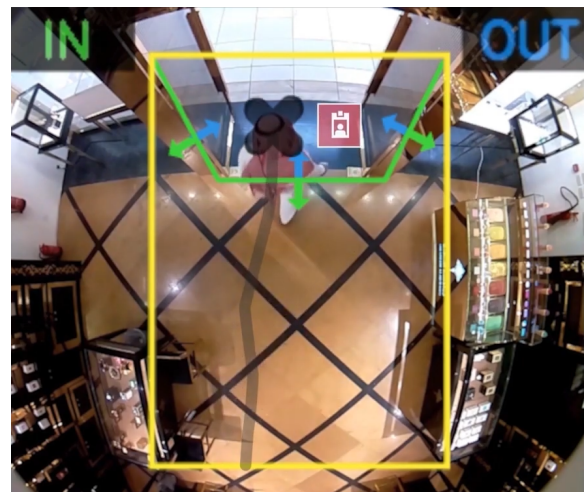

- FootfallCam People Counter MUST be version 3.3.0 and above in order to process HD video
- The basic Patterned Staff Tag MUST be a FootfallCam design with a striped pattern
- Staff Live view must have enough walking space (>2m from the centre of the live view, equivalent to > 4m coverage in the walking direction) for staff to be detected.
- Recommended ceiling height for 2.5m -3.2m. If the ceiling height is above 3.2m, it is possible to install drop poles to lower the mounting height within the recommended height range.
- Only compatible with Normal Counting mode. Not supported for Queue Counting or Heatmap Counting mode.

GUIDELINE TO WEAR PATTERNED STAFF TAG

- Wear a tag in the centre of the upper chest area for the best accuracy.
- Wear a tag upright, and not dangling downward.
- Wear tag in landscape orientation as diagram beside
- Do NOT wear tag with a lanyard or hide tag in a pocket or cover tag with other objects such as tudung, scarf, hair, hand.
- Simple and plain coloured shirts work better than colourful shirts with complex patterns/ stripes.

HOW IT WORK

1. The user will wear the staff exclusion tag before walking through the tracking zone.
2. The user will automatically be detected as a staff
3. The user can proceed to walk through the entrance and they will be excluded from being counted.
